

Evidence 8: Spatial GNN — NOT AVAILABLE

NOT AVAILABLE

GNN attention weights (`att_weights`) are ephemeral `forward()` outputs.
No saved attention/edge tensors found on disk.

Available without GNN re-extraction:

- Station-level predictions: 2880 rows
- Azimuth quadrant CM from `v8_confusion_matrices.txt`
 - Station distribution in E_2

To generate: Modify inference to capture `att_weights` per sample.
